Included in your Chalk Box™ kit:

**Chalk Couture™ Transfer:** This is Us

**Chalkology™ Paste Singles:** Bright White and Bumblebee

**Surface:** Couture Boutique™ Board & Pillar Stand

Additional supplies needed:
- Multi-Tool
- Small Squeegee
- Fuzzing Cloth

Follow these instructions to complete the Chalk Box™ project:

1. Prepare your board by removing the wood peg in the back. This allows you to take the board off the stand so it can lie flat while you work. Wipe the board surface clean of any debris or dust.

2. Prepare your Chalk Transfer™ design by removing it from the packaging and cut apart the individual elements. Label the backer papers with marker to correspond with the image. This expedites cleanup.

3. Select which sentiment you would like to use. For this how-to we have chosen the “It’s so good to be home” element.

4. Remove the backer from the chosen Transfer and “fuzz” it to gentle the adhesive by sticking the adhesive side to the Fuzzing Cloth to pick up a bit of lint before applying it to your board.

5. Position your Transfer element in the center of the board and smooth it down to adhere to your surface, ensuring there are no bubbles.

6. Prepare your Chalkology™ Paste by tearing off corners of the Paste Singles packets and squeezing desired amounts onto a dish or other palette surface.

7. Pick up a small amount of Bright White Paste on the detail end of the Multi-Tool and smooth it over the words “It’s so good to be.” Be sure to cover the screen portion completely, but don’t scrape off the excess yet.

8. Working quickly with a clean Small Squeegee, apply Bumblebee Paste to the word “home”.

9. When all the screen portions of the Transfer are completely covered, squeegee the excess paste off the Transfer as evenly as possible (using respective tools for each). The more excess paste you remove, the better the result.

10. Carefully peel the Transfer off the board before the paste dries and put the Transfer in water immediately to clean thoroughly. Once clean, lay it flat to dry sticky side up.

11. Once the Transfer is completely dry, reapply the backer and store flat.
